Case History

A 2000 tube falling film evaporator was completely fouled with 80% total blockage of the tubes.

EAGLE employed 10,000 psi water, working around the clock to open the plugged tubes. **EAGLE** then retooled with spinning nozzles to polish the interior tube walls to optimize heat transfer when the unit went back into production.

The project was successfully completed in less than 72 hours.

EAGLE SERVICES CORP provides industrial / environmental clean up services, 24 / 7 / 365, to process industries in the Midwest and planned clean up services from coast to coast.
