Case History

A duct work system in a large facility was contaminated with accumulations of dust and mold.

These contaminants were suspected to be the cause of adverse health issues with occupants of the building.

EAGLE employed dry cleaning and vacuum methods to remove the materials from the duct work, then applied appropriate moldicides to mitigate mold contamination.

After project completion, building health was restored.

EAGLE SERVICES CORP provides industrial / environmental clean up services, 24 / 7 / 365, to process industries in the Midwest and planned clean up services from coast to coast.
