

With over 400 years of combined reliable management experience, Eagle Services offers industrial cleaning, environmental cleaning, and industrial maintenance projects for customers in a wide variety of industries.

SEWER CLEANING WITH RODDING & VACUUM EQUIPMENT

A closed refinery had 8 miles of contaminated process sewers which needed to be cleaned and video inspected after the cleaning to document that they were free of contamination.

Eagle Services removed the debris from the sewers utilizing sewer rodding and vacuum equipment, then transported it to an on site processing area where the debris was filter pressed to separate oils, solids, and water. The oil was recovered and recycled, the solids packaged for disposal and the water cleaned so that it met the owner's NPDES permit.

Eagle Services documented the sewer cleaning with video inspection, a library of tapes, and a 2,000-page final report which was submitted to the owner. The project was completed on time and 20% under budget.
