SILO CLEANING & VACUUMING

A soy processing plant in Quincy, IL had several fires inside their storage silos. After another contractor had several failed attempts of using a pneumatic bin wips, the plant decided to call Eagle Services Corp. We created a customized action plan, job hazard safety analysis, and executed it flawlessly.

Eagle Services utilized a 20,000 PSI Pump with our 3D hurricane spinner, a specialized winch and tripod to lower the hurricane throughout the silo to remove bridging safely and successfully. Below, two vacuum trucks collected the material, swapping out for each dump.
