AUTOMATED HIGH-PRESSURE WATERBLASTING TO CLEAN PAINT BOOTHS

Paint booth bottoms had a build up of sludge which was hindering hydro bin air flow.

The booth top was contaminated with dry paint overspray, which posed the threat of falling onto new car paint as production continued. Eagle Services waterblasted the booth top, walls, ceilings, and floor grating removing all paint. The booth bottoms were then hand scraped and vacuumed clean. Eagle Services moved to the paint sludge pits, removing over 400 cubic yards of paint sludge, utilizing 10,000 psi to 40,000 psi waterblasting and vacuuming.

This project was completed safely and on time to allow the start of the production line as scheduled, and the line ran within the quality specifications of the customer.
