AUTOMATED HIGH-PRESSURE WATERBLASTING FOR A 7000-TUBE EVAPORATOR

In a cold February, a major corn processor in Lafayette, IN had a major problem. Their waste heat evaporator had gotten completely fouled and was operating well below expectations. After their local contractor could not respond in appropriate time, they called Eagle Services. Eagle Services employed (5) 40k PSI pumps, (3) XY automated tube cleaning system with spinning nozzles, and an around the clock crew to support for 72-hour coverage.

The evaporator had 3 chests with a total of over 7,000 tubes. The job was completed in under 72 hours safely and successfully. The corn processor was able to return to max production rates after firing up ahead of schedule.
